-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Preliminary Amendment

1. Applicants have submitted a preliminary amendment filed on April 16, 2001, canceling original claims 1-6, adding new claims 7-12, and substituting the specification including the abstract.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “identification area, authentication area, comparing, and calculating an identification code” must be shown or the features canceled from the claims. No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Abstract

3. The abstract of the disclosure is objected to because the amended abstract is combined with the specification. Applicant is reminded of the proper format for an abstract of the disclosure. The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. Correction is required. See MPEP § 608.01(b).

Claim Objections

4. Claims 8 and 10-12 are objected to because they depend on claims that have been canceled, and thus are treated as incomplete.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 7 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. For example, claim 7 recites the limitation “a computation device for calculating an identification code, which identifies the person detected by the sensor, from the detected biometric features which are not stored in the memory based on the relative position of the biometric features which are stored in the memory within the stored authentication area” is unclear. A similar limitation also occurs in claim 9. It is not clear where or what region (or area) of the authentication area that the biometric features which are not stored in the memory, and are used to calculate the identification code come (or derived) from, in relation to the biometric features that are stored in the memory. Please clarify.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent Numbers: 5241606, 5701770, 5719950, 5917928, 5933515, and 6219793.
